“With over 60,000 chemicals used in the US, only 91 contaminants are regulated by the Safe Drinking Water Act”. **US EPA**

“Water provided to more than 49 million US

people has contained illegal concentrations of chemicals like arsenic or radioactive substances like uranium, as well as dangerous bacteria often found in sewage...

...records show that fewer than 6 percent of the water systems that broke the law were ever fined or punished by state, federal, and EPA officials who have the ultimate responsibility for enforcing standards”.

***The New York Times: Toxic Water, December 7, 2009***

EPA official says, “Utah may be the worst in the nation at monitoring water quality”

***Salt Lake Tribune: Naomi Wolf***

A growing number of Doctors now recommend having your water tested in your own home by an independent water testing company, rather than trusting the municipalities to protect you.

**Aid us in our research, have YOUR water tested, and get the FACTS. It really IS that important!**
